Independence Day sale: E-commerce firms witness 23% surge in orders

E-commerce firms such as Amazon, Flipkart, and Tata Neu are witnessing a significant surge in orders during various Independence Day sale events, reflecting the maturing status of India's e-commerce industry.

The Independence Day sale marks the kickoff of major sales in the latter part of the year, setting the stage for festive season sales in the coming months. Starting on 4 August, this year's Independence Day sale has seen a remarkable 23 per cent surge in order numbers compared to the previous year, with volume growing across key segments, according to an analysis by SoftBank-backed e-commerce tech firm Unicommerce.

"E-commerce in India has come a long way in the last three years, with consistent growth throughout the year instead of just growth spikes in a few months in a year," said Kapil Makhija, chief executive officer of Unicommerce.

"This journey reflects a maturing ecosystem and demonstrates that brands (offline and digital-first alike) are focusing on e-commerce as their core strategy and are prioritising providing a seamless experience to the consumers instead of focusing on acquiring customers through discounted prices."

For instance, the home decor sector experienced a substantial order volume rise of 37.8 per cent. Beauty and personal care saw year-on-year

growth of 26.8 per cent, while the fashion and accessories segment recorded a 14.7 per cent uptick, and eyewear experienced an 18 per cent surge within the same timeframe.

Meanwhile, offline retailers expect the slowdown that they have been witnessing post the festive season to see some reversal in the ongoing Independence Day sales which has started from Sunday as they expect footfalls to also be higher.

"We expect good growth this Independence Day and expect it to be in low double-digit compared to last year. We are currently running a buy-one-get-one free offer and also offering vouchers which can be redeemed in later months," said Lalit Agarwal, founder and managing director, V-Mart Retail.

Multibrand retail store chain Lifestyle expects better growth than the April-June quarter and expects it to be higher by 4-5 per cent sequentially and also expects same-store sales to be in the positive compared to last year's Independence Day Sales.

"Discounts are not much as we liquidated most of our stock in the end-of-season-sale. Around 40-50 per cent of the merchandise in our stores is the new autumn-winter collection and the remaining stock is going at flat 40 to flat 50 per cent discount and the new merchandise will come into the

stores from Wednesday onwards," said Devarajan Iyer, chief executive officer, Lifestyle said.

He also said, "We expect footfalls to be higher and hope for a reversal of muted sales trend which we have witnessed for the last few months."

Amazon India hosted the 'Great Freedom Festival' early this month and it concluded recently. Customers explored offers on millions of products and shop from a wide selection. They shopped products from sellers including artisans and weavers, women entrepreneurs, start-ups, brands, and local neighbourhood stores. These were across categories including smartphones, consumer electronics, grocery, fashion and beauty essentials, home and kitchen, large appliances and TVs. It offered up to 60 per cent off on appliances, up to 50-80 per cent off on Amazon fashion and beauty essentials, up to 50 per cent off on grocery essentials and up to 70 per cent off on home, kitchen and outdoor.

Some of the top brands which offered these products included Xiaomi, Samsung, LG, Hisense, Ariel, Microsoft, L'Oréal Paris, Lakme, Tresemme, Dove and Ponds.

Customers also got a chance to win up to Rs 5,000 as cashbacks during the rewards festival through Amazon Pay. They were also able to avail instant credit up to Rs 60,000 with Amazon Pay.

Sify Technologies to invest Rs 3K cr in 5 yrs to boost data centre capacity

Sify Technologies will invest Rs 3,000 crore to expand its data centre capacity across India over the next five years, according to a top executive at the company. Its current data centre capacity stands at a little over 100 Mw, which it operates through 11 facilities in six cities/region: Mumbai, NCR, Kolkata, Hyderabad, Chennai, and Bengaluru.

Kumar, executive director and group CFO of Sify.

Two-thirds of Sify's capacity serves hyper scalers and one-third is with enterprise clients. The banking, financial services & insurance (BFSI) sector drives demand for Sify's data centres, followed by verticals like e-commerce, media & entertainment, manufacturing, and retail. "All of these segments, including

annum in two years. As of March 31, Sify's revenue stood at Rs 3,340.40 crore, an increase of 24 per cent from the previous year. Of total revenues, 30 per cent is from its data centre collocation services, 30 per cent from its digital services, and 40 per cent from its network services.

Sify's journey began in 1998 as India's inaugural internet service provider, overseeing about 6,000 cyber cafes nationwide. However, with the rise of new technologies, major global internet giants like Google and Yahoo emerged, prompting Sify to shift its trajectory around 2012 to become an enterprise IT infrastructure and services company.

The company has set its sights on adding 350 Mw of capacity in the coming years.

Currently, three greenfield data centre projects are under construction with a design capacity of close to 200 Mw. The first one, with a capacity of about 38 Mw, is expected to be operational in October this year. The remaining two projects in Noida and Chennai, with a design capacity of 80 Mw each, are expected to become online by the end of this financial year.

the government, are driving a significant portion of consumption in the country," said Vijay Kumar.

The data centre market is booming in India as enterprises migrate to the cloud which, in turn, has pushed increased investments in hyperscale data centres. According to Nasscom, global data centre market investments are expected to reach \$200 billion per annum by 2025 and India is expected to get a share in this growth with investments in the country expected to reach approximately \$5 billion per

Sify in India competes with players like NTT Global, CtrIS, STT Global Data Centres, and Nxtra by Airtel. NTT Global has 16 facilities in India with a total capacity of about 204 Mw. CtrIS operates 10 data centres in India across five cities with a total capacity of about 120 Mw. STT currently has 24 data centres across nine cities with a capacity of 250 Mw, while Nxtra by Airtel has 12 large and 120 edge data centres with a total capacity of about 200 Mw.
